

Billy H. Kim

Orange County, CA • billson.kim@gmail.com • 714.951.3550

Experience

Movology

Software Engineer

November 2019 — Present • Anaheim, CA

- Optimized client-facing dashboard in **React** and **MobX** to sort and cache large data and update UI/UX features with **Semantic UI**
- Developed custom account connection features for clients with **Typeform API**
- Tested client integrations on schedule using **Puppeteer API** & **node-cron**
- Added custom user verification using **Firebase-Admin SDK** and **Mailgun API**

Software Engineer Intern

October 2019 — November 2019 • Anaheim, CA

- Completed software integration with **Mailchimp API** using **Node.js** and **OAuth 2.0** to add contacts to client dashboard based on abandoned forms

Naked Development

Full Stack Developer (Contractor)

July 2019 — August 2019 • Irvine, CA

- Developed mobile apps in **React Native** & **Redux** using **Expo CLI**
- Created admin portal in **React** and **Lodash** to parse live data
- Worked on front-end for proprietary heart-health tracking application to create screens according to wireframes

LearningFuze Web Development Bootcamp

Assistant Instructor

June 2019 — July 2019 • Irvine, CA

- Assisted students on topics including **JavaScript**, **jQuery**, **OOP**, **React**, **HTML** & **CSS**, and working with APIs using **Postman**
- Provided onsite help and code reviews for two-day hackathons
- Conducted one-on-one tutoring sessions for students

Applications

Ekko Practices [Live](#)

- A responsive web application offering visual tool for organization
- Front-end developer working with **React** for fast page loading, using **Redux** for application state management, and deployed with **Netlify**
- Utilized **HTML5** and **CSS3** to create a cohesive **UI/UX** design

Size10 [GitHub](#) • [Live](#)

- A full stack E-Commerce shopping cart app supporting **CRUD** operations
- Built with full **React** front-end using **Fetch API** to work with back-end database utilizing **JSON**, **PHP**, **MySQL**, and **phpMyAdmin**
- Utilized **Reactstrap** for UI/UX features and deployed onto **AWS EC2**

PBS Kids Memory Match [GitHub](#) • [Live](#)

- A card-matching memory game with live updating statistics
- Built logic and operations in **JavaScript** and **jQuery** in **OOP**
- Applied responsive mobile and desktop with **HTML5**, **CSS3**, and **Flexbox**
